Alyeska recognized as a World's Most Ethical Companies, second year in a row

The Ethisphere Institute has recognized Alyeska Pipeline Service Company with a 2013 World's Most Ethical (WME) Company award. The institute announced its selection today, March 5, at the 2013 WME Honoree dinner in New York.

"We have earned this award two years in a row. This shows Alyeska employees and contractors live the values embedded in our policies and in our code of conduct every day," said Tom Barrett, Alyeska Pipeline Service Company President. "Ethics begins with our people. Without their ongoing commitment to integrity, the best policies and procedures in the world wouldn't hold up."

Alyeska received the award for demonstrating the following:

- Strong and consistent safety and environmental record.
- Excellent code of conduct and an open work environment that encourages employees to raise concerns and identify company improvements.
- Sustainability initiatives designed to extend the life of the pipeline and protect the environment.
- Established policies and procedures that foster ethical behavior.
- Direct lines of communication between the workforce and leadership.
- Corporate citizenship programs, including the annual United Way campaign, school partnerships and matching employee philanthropy contributions.

Alex Brigham, Executive Director of Ethisphere, said the institute is "seeing more companies be proactive and create new initiatives that expand ethics programs and cultures across entire industries... We are excited to see the 2013 World's Most Ethical Companies take these leadership positions, and embrace ethical behavior."

The Ethisphere Institute is an international organization dedicated to the creation, advancement and sharing of best practices in business ethics, corporate social responsibility, anti-corruption and sustainability. Read about Ethisphere's selection criteria and view the complete list of 2013 World's Most Ethical Companies at <http://www.ethisphere.com>.

About Alyeska Pipeline

For 35 years, Alyeska has operated the 800-mile Trans Alaska Pipeline System (TAPS), safely moving oil from Prudhoe Bay on the North Slope of Alaska south to the Port of Valdez, the northernmost ice-free port in the United States. The pipeline traverses three mountain ranges, permafrost regions and 34 major rivers and streams. Alyeska personnel work in Anchorage, Fairbanks and Valdez and at pump stations and response facilities all along the pipeline. They also operate the Ship Escort/Response Vessel System (SERVS) for Prince William Sound. Alyeska was created to construct, operate, and maintain TAPS for owner companies which today are BP Pipelines (Alaska), ConocoPhillips Transportation Alaska, ExxonMobil Pipeline Company, Unocal Pipeline Company, and Koch Alaska Pipeline Company.
