Oil Reserves:
- ~ 2.8 BBO of proved oil reserves estimated on the North Slope (EIA, 2014)

EXPLORATION LICENSE PROGRAM

- The program supplements the state's oil and gas leasing efforts & encourages exploration outside of known oil & gas provinces
- Every April, DNR accepts proposals to conduct exploratory activity outside existing leasing areas
- The DNR Commissioner may issue a notice requesting proposals to explore a designated area (encourages competition)
- The applicant has up to 90 days to submit their proposal
- Three exploration licenses have been converted to lease: Susitna II, Copper River, & Nenana

DNR Involvement in DOR Tax Credits Under AS 43.55

- DNR involvement is limited to projects that yield geological, geophysical, and engineering data – mainly exploration wells and seismic surveys.

- DNR collects and adjudicates data generated and releases to the public as per specified schedule & private land restrictions.

- DNR has no role in credits that do not require data submission:
  - .023(a)(1) Capital Expenditure for development work
  - .023(b) Net Operating Loss

- Statutes vary but provide minimal ability to screen proposed projects for geologic or commercial risk. When called for, pre-qualification mostly ensures “wildcat”/new exploration status.
