Possible Senate Bill

The proposal would not achieve:
- Dealing with the nonsensical BOE cross subsidization and therefore, in case of any proposal by the major oil companies on a Pacific LNG project, the PPT would have to be significantly modified again to make such a proposal work,
- Creating an “architecture” to which new Alaska resources can be added, such as heavy oil, shale oil and natural gas,
- The stimulus of investment in heavy oil, oil shale or natural gas and thereby the achievement of the one million bopd goal.
